European Utility Week

POWERGEN EUROPE

12 - 14 November 2019, Paris Expo Porte de Versailles, Paris, France

WHY JOIN US AT THE DISTRIBUTED GENERATION HUB?

Distributed Generation is the theme of one of the presentation theatre Hubs hosted during Europe's most valuable end-to-end energy event, namely POWERGEN Europe and European Utility Week.

POWERGEN Europe and European Utility Week combine to offer the platform for achieving a fully integrated and interconnected energy system and market in Europe. With over 18,000 attendees the event will host all the key players in the transitioning energy ecosystem to discuss European strategy and technology options to achieve a smooth transition towards a low carbon energy supply. Distributed Generation is an area on the exhibition floor with its own free-to-attend Hub conference programme and networking areas.

While Europe still requires the capability of centralised power stations to deliver the gigawatts of electricity needed to maintain system stability, the indisputable trend in new build is towards different types of distributed generation. Understanding what is behind this fundamental shift is key to any business looking to invest in Europe's power infrastructure, supply technology or provide services.

GREAT FREE CONTENT

3-day Hub Session programme offers free-to-attend sessions including these key topics and technologies:

- Gas turbines
- Gas engines
- Off-grid solutions
- District Heating/cooling
- Industrial cogeneration
- Renewable integration
- Hybrid power plants

Other topics of interest:

- The new energy mix
- Sector coupling
- Cyber security
- Digitalisation
- C & I energy strategy,
- Plant optimisation

For more strategic market insights join the Summit. This is a 3-day paid-for programme for high-level knowledge sharing and industry insight.

Industry Experts

Some of the industy's leading practioners, project operators and technology experts will feature as speakers or chair sessions in the Distributed Generation Hub:

- Christian Payerl, Sales Manager for Synchronous Condensers, ABB
- Jens Reich, Director Energy Technologies, STEAG GmbH
- Eric Lardeur, Project Leader, Double A Alizay
- Romain Verles, Development Manager, GRTgaz
- Christer Bjorkqvist, Managing Director, European Turbine Network
- Hans Korteweg, Managing Director, COGEN Europe

Interested in speaking? Send us a mail with an abstract: **conference.europe@clarionevents.com**

Distributed Generation at the event

The future of Distributed Generation and unpacking its challenges and opportunities will feature heavily right across the Summit programme and in the dedicated Distributed Generation Hub in Paris. During the three days of the event we will take a deep dive into the strategic, environmental drivers and technical advances that are propelling this fundamental change in the industry. Find out where digital technology is taking the industry, what are the best practices being deployed and which are the stand-out projects in the vanguard of distributed energy generation.

Great Networking Opportunities

The accompanying exhibition is your marketplace to high-value business and networking opportunities with innovative solution providers and stakeholders that span the entire end-to-end energy value chain.

Who will you meet?

You will meet energy project developers, utilities, municipalities, IPPs, C & I energy users, fleet managers, private equity investors, equipment suppliers and service companies.

COME AND JOIN US!

Your free visitor pass includes access to the event, the Hub Session Programme and of course the Distributed Generation Hub Session.

Register for your free visitor pass by going to our website: **www.powergeneurope.com/register**
