

QUICK FACTS ABOUT EUW & PGE

EVENT HOURS

Tuesday, 12 November	Opening hours	08h00 – 18h30
Wednesday, 13 November	Opening hours	08h00 – 18h30
Thursday, 14 November	Opening hours	08h00 – 16h00

VENUE

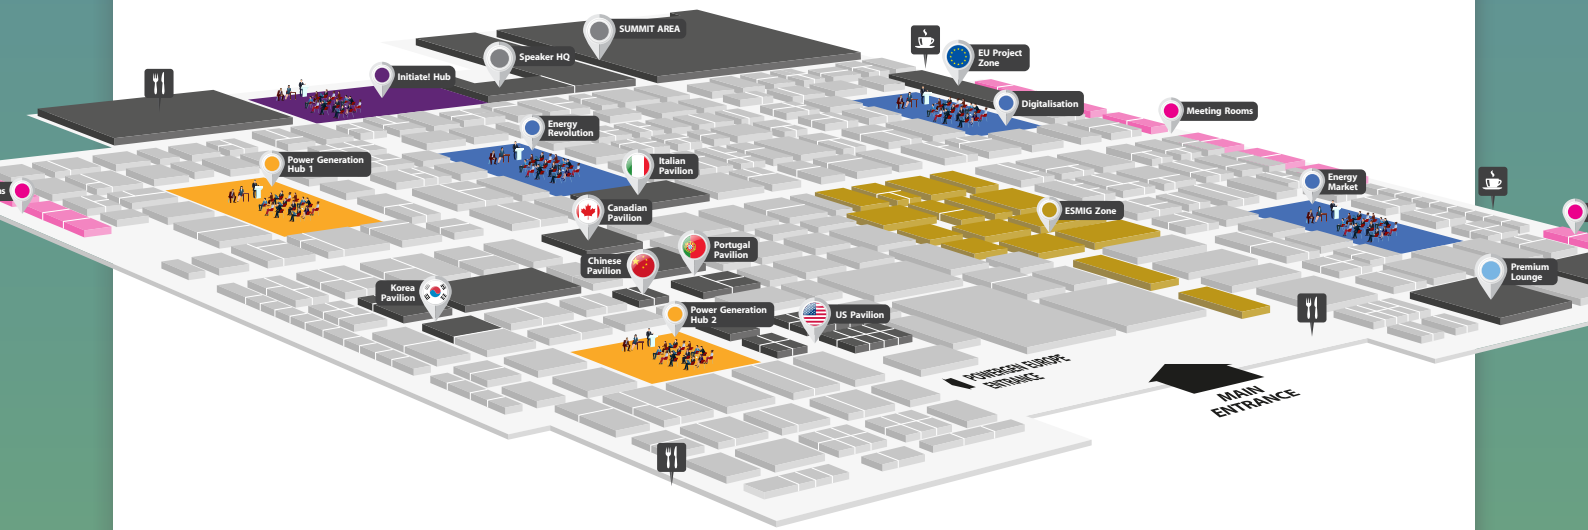

Paris, Paris Expo Porte de Versailles
1 Place de la Porte de Versailles, 75015, France

This year European Utility Week will co-locate with POWERGEN Europe, an event that has established itself as the centre point for the power generation sector. With over 800 exhibitors, both events will offer unrivalled opportunities for anyone in the energy space looking to source solutions and services within the European end-to-end energy ecosystem.

EXHIBITORS

 **800**
International exhibitors

2 CONTENT-RICH PROGRAMMES

Summit Session Programme

3-day programme highlighting strategic themes causing shifts in the utility business. Designed with the objectives of the energy community in mind, this high-level knowledge sharing programme features 4 key themes crucial for businesses striving to achieve a fully integrated and interconnected electricity system.

- The New Energy Mix: With the EU's 2020 climate and energy targets now just months away, a new scenario for Europe's energy system must be put into action – one that is complementary, adaptable... one might even say hybrid.
- Energy Markets: The Energy Markets Programme will consist of an Energy Markets track in the strategic Summit and on the Energy Markets Hub Sessions Programme on the exhibition floor, with sessions in our Power Trading theatre and in our Gas Trading Theatre
- Digitalisation: For 2019, the Digitalisation programme is going to return to the basics. We are going to focus on the core of digitalisation, mainly the use of digital technologies (sensors, meters, connected devices, infrastructure, etc.) that help reduce costs and rapidly transform the existing business models by creating – among other things – new sources of revenue.
- C&I - Commercial & Industrial Energy Users: In its third successful year at European Utility Week, the C&I event will become a full Summit track FREE to pre-qualified energy management professionals who want to learn, share and network with their peer group and leading utilities, suppliers and innovators in this space.

Dedicated Hubs and zones on the exhibition floor

- Energy Revolution
- Energy Market
- Digitalisation
- Initiate!
- Distributed Generation
- Management Life Cycle

Products and services displayed on the exhibition floor include:

- AI
- Blockchain
- Cyber Security
- Energy Trading
- EV Infrastructure/Charging
- Intelligent Buildings
- IoT
- Smart Cities
- Smart Grids
- Smart Metering
- Storage

With the co-location of POWERGEN Europe, these type of solutions will also be showcased on the exhibition floor:

- Back-up Power Systems & Inverter Suppliers
- Biomass Application & Equipment Suppliers
- CSP Equipment Companies
- Developers & Consulting Engineers
- Diesel/Gas Engine Manufacturers
- EPC Contractors
- Generation Technology & Component Vendors
- Generator Suppliers
- Hydro Turbines & Component Vendors
- Measurement, Controls & Tracking Systems
- Nuclear Plant Equipment & Services
- Power Plant/Asset Management
- PV Equipment Providers
- Turbines/Boilers/Steam
- Wind Turbines & Component Providers

VISITOR PROFILE

 **18,000+**
including:

- Utilities
- Retailers
- Commodity Traders
- Renewable Energy Providers
- Large Energy Consumers
- Regulators & Policy Makers
- European Bodies
- Energy Agencies
- Municipalities
- Regions
- ESCOs
- Aggregators
- Consultancies
- Investors & Financial Institutions
- Brokers
- Analysts
- Startups
- Students
- Grid Operators
- Telecoms
- Media
- Solution Providers
- Industrial and Commercial energy consumers
- Independent Power Producers
- Small & Medium Utilities
- Renewables
- Energy trading
- Wholesale energy market
